

Protector Concrete Systems Pty Ltd was created in 2019 in support and contribution to the Protector Group.

Due to the professionalism and success of the two Protector sister companies, Protector Building Systems and Protector Grain Systems, multi-national construction companies have requested the consultation and assistance to provide customised packages supplied and installed onto sites around the nation.

Protector Concrete Systems is based in Sydney and provides turn key batch plants small and large in any configuration to suit market demand and maximising production requirements.

Protector Concrete Systems is a privately-owned company that prides itself on its honesty, integrity and efficiency. The company director continues to manage day to day operations with a highly skilled team of key personnel.

Protector Concrete Systems has the capability of providing a range of products from complete turn-key solutions to any finite portion within the project life stream. Design (Concept and Final), Council Approvals, Fabrication, Procurement, Construction, Commissioning and Project Management.

Protector Concrete Systems has a wealth of batching and mechanical knowledge and can also review operating sites and provide plant optimisation strategies.

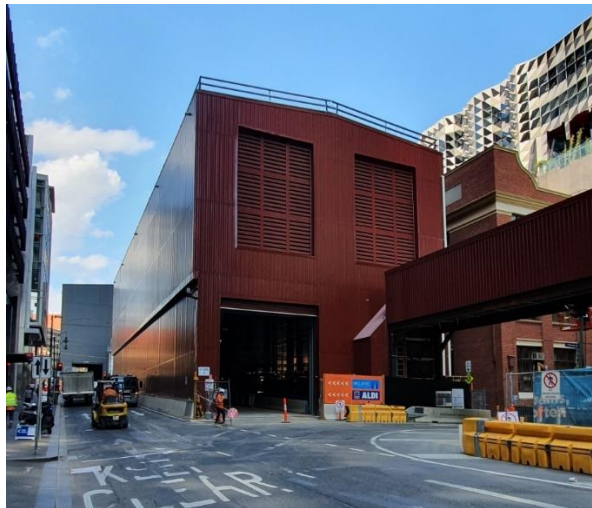

Furthermore, at Protector Concrete Systems we are committed to the growth and development of local businesses.

Protector Concrete Systems is a fledgling company, however to assure our capacity in the industry here are some of the previous works by the Protector Group and Suppliers;
